SUMMARY

I am a natural-born self-learner who adores new technologies and accepts challenges, this attitude made me an enthusiastic problem solver. I have a business-centric and data-driven mind along with creativity. I am always looking for growth opportunities and improvement. These are why I love development, and mobile development .

EDUCATION

Bachelor's degree

Computer Software Engineering

Sadjad University of Technology

Mashhad, Iran

2012 - 2017

After five years of working in the hardware section and gaining three years of experience in mobile software, I realized the intricate connection between software and hardware. This realization sparked my interest in Android programming. Consequently, I decided to shift my career path and embarked on my journey in Android programming.
